Summary

Engineer with nearly 4 years of experience in API integration, workflow orchestration, and customer-facing technical delivery, completing an M.S. in Information Systems at Northeastern University. Has served as the technical point of contact on platform migrations and API delivery across engineering, product, and business stakeholders, building secure integrations. Runs self-hosted n8n in Docker and builds agentic automations connecting LLMs, APIs, and business systems.

Education

M.S., Information Systems — Northeastern University, Boston, MA

Dec 2026

B.E., Information Technology — Shri G. S. Institute of Technology and Science, Indore, India

2021

Publication: "Safeguarding Digital Assets: Harnessing the Power of Artificial Intelligence for Enhanced Data Protection," IJISRT, Vol. 8 Issue 12, Dec 2023.

Skills

- **Cloud & DevOps:** Docker, self-hosted deployments (VPS), AWS, Firebase/Firestore, CI/CD, Git/GitHub
- **Integration & Automation:** n8n (self-hosted), REST APIs, Webhooks, OAuth 2.0, JWT, Postman, API testing & validation, LLM/agentic workflows
- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, Python, Java, SQL, Solidity · Node.js, React, Next.js, Redux, Django
- **Data & Visualization:** MongoDB, SQLite, Firestore, D3.js, Chart.js, Figma

Professional Experience

VeraAI Technologies Inc., St. Petersburg, FL

Jul 2025 - Dec 2025

Frontend Lead

- **Promoted from SDE Intern to Frontend Lead;** became technical point of contact for architecture decisions, ran sprint planning across contributors, and coordinated multi-developer merges and release stability via GitHub.
- **Integrated multi-source product catalogs** (IKEA, Home Depot) from Firestore into the customer-facing dashboard, normalizing differently-structured supplier data into a single product model for live inventory placement.
- **Containerized and deployed the full product in Docker,** taking it from a local Next.js codebase to a reproducible hosted deployment, authored the image and environment configuration and standardized the release path across the team.
- **Built an image-to-layout pipeline** converting a customer photo into a 2D component template and 3D placement sandbox; integrated Stripe billing across pricing tiers and an in-product AI chatbot for user guidance.

AESS Solutions Pvt. Ltd., Bhopal, India

Nov 2022 - Aug 2024

Assistant Manager of Front-End Development

- **Technical point of contact for the PeopleSol HRMS migration** from .NET to React: led technical discovery with platform owners and translated implementation tradeoffs into decisions business stakeholders could act on.
- **Improved deployment efficiency 30–40%** by owning API testing, integrations, and production bug triage, introducing structured validation into the release process to reduce post-deployment incidents
- **Delivered data-driven platform modules** including D3-based org hierarchy visualization and API-integrated scheduling; reusable component library cut code redundancy 60%

Apright Software Solutions Pvt. Ltd., Bangalore, India

Jul 2021 – Nov 2022

Associate Software Engineer

- **Built secure OAuth 2.0 and JWT authenticated APIs in Django** for hardware control systems, then tested in Postman and integrated them end to end, the authentication and integration patterns underpinning production client deployments
- **Delivered Visitor Alert Management and Service Management modules** on Django MVT, reducing component latency 20% and template render latency 30% through targeted profiling and query optimization.
- **Optimized database operations** improving data-handling efficiency 30%; managed code review and pull requests on GitHub across the team

Projects

- **Uniswap V2 Interface (Next.js, TypeScript, ethers/viem, Chart.js):** Production-deployed swap and liquidity interface with pool selection, live reserve/price analytics, and constant-product curve visualizations.
- **NexTap NFC Wallet System (React, TypeScript, Redux):** Wallet platform using NFC cards and QR-based login to streamline onboarding and transaction approval, with state-managed authentication and approval flows.
